ABOUT

Production Runner & Crew Member with experience supporting fast-paced commercial productions, branded content shoots, and live events for global brands. Known for being proactive, adaptable, and calm under pressure, I have worked across a range of on-set responsibilities including logistics, talent support, equipment movement, set preparation, and assisting production teams to ensure smooth day-to-day operations.

Born and raised in South Africa, I recently graduated from University Academy 92 with a Sports Management degree awarded by Lancaster University. In 2024, I founded Caved Media, a marketing agency working with South African businesses and sports brands such as AdaFit, where I developed strong project management, communication, and organisational skills. Alongside my professional work, I train in boxing, which has strengthened the discipline, resilience, teamwork, and work ethic that I bring to every production. I am passionate about building my career in the industry and continuing to gain experience across commercial, television, and film productions.
